

step 1 From the top left corner of the WINDOWS LIVE mail window, click the **BLUE TAB**.

step 2 From the drop-down list, select **OPTIONS**. Then click **EMAIL ACCOUNTS** from the second drop-down list.

step 3 Choose your email account and click **PROPERTIES** on the right side.

step 4 Select the SERVERS TAB and verify the following settings for accuracy:

My incoming server is a **IMAP** server.
We recommend using IMAP as it can help prevent email loss.

INCOMING MAIL: mail.eatel.net

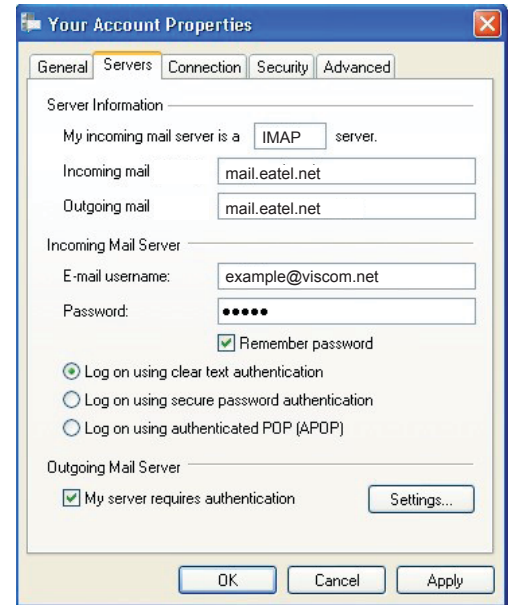

OUTGOING MAIL: mail.eatel.net

INCOMING MAIL SERVER

EMAIL USERNAME: your **full email address** should be here
SELECT Log on using clear text authentication

OUTCOMING MAIL SERVER

MY SERVER REQUIRES AUTHENTICATION is **CHECKED**

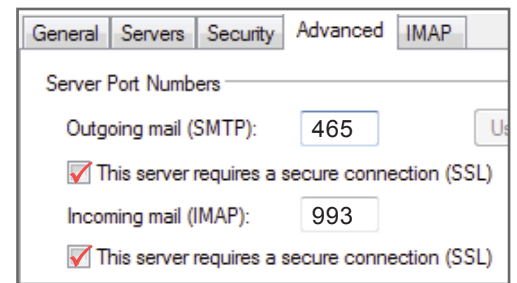

step 5 Select the ADVANCED TAB and verify the following settings for accuracy:

OUTGOING MAIL (SMTP): **465**

MY SERVER REQUIRES A SECURE CONNECTION (SSL)
is **CHECKED**

INCOMING MAIL (IMAP): **993**

MY SERVER REQUIRES A SECURE CONNECTION (SSL)
is **CHECKED**

step 6 After you have verified all of the information is correct, you can click **APPLY** at the bottom right save these settings.
